British Gas launch WebSaver 11

British Gas has today, 23rd February 2011, launched WebSaver 11.

WebSaver 11 is already live across all Energylinx platforms and as usual missing from our competitor platforms, so expect some questions.

The key features of WebSaver 11 are:

- This tariff is available to credit meter customers in all regions.
- Only available to new customers taking Dual Fuel and existing customers taking Dual or Single fuel.
- Only available to customers paying by Direct Debit.
- A guaranteed discount period is offered, with a minimum 6% discount against British Gas standard tariff prices until 31st May 2012.
- Whether prices go up, down or remain the same, WebSaver 11 will be a minimum 6% below the standard tariff rates.

At the same time as this launch WebSaver 10 and Price Promise 2012 have been removed from sale.
